

FOR IMMEDIATE RELEASE

DynamicSignals LLC Completes Acquisition of Signatec, Inc.

Lockport, Illinois – August 30, 2011 – DynamicSignals LLC, a leading provider of innovative and high-performance data acquisition products and integrated system solutions, today announced the completion of the acquisition of Signatec, Inc. Newport Beach, CA. The acquisition of Signatec, Inc. brings together two established and respected names to better serve their customers on a global basis.

The Signatec brand will join the other DynamicSignals brands – Gage, KineticSystems, Preston Scientific and Cyber Systems - and continue to offer its unique product solutions for ultra-deep disk storage systems, open FPGA technology and digital signal processing applications.

“Both companies have a tradition of commitment to serving our customers’ needs in the best of all possible ways,” said William Boston, President of DynamicSignals. “We are confident that the integrated resources will provide our customers with unique benefits in satisfying their requirements for superior data acquisition solutions,” Boston added.”

The acquisition brings together some of the industry’s strongest brands including GaGe, KineticSystems and now Signatec, to provide data acquisition technologies across multiple platforms such as PCI Express/PCI, USB/ExpressCard and PXI/cPCI, for use in various applications including military and aerospace, wireless communications, manufacturing test, laser optics and ultrasound to name a few. DynamicSignals will continue to market and support Signatec’s internationally recognized brand as an industry leader in high-speed data acquisition solutions including ultra-high capacity data recording and programmable FPGA based digital signal processing (DSP) systems.

“This is fantastic news for Signatec’s customers, partners and employees,” said Thomas Hunt, President and CEO of Signatec. “DynamicSignals’ data acquisition solutions span the full range of platforms and industries worldwide, and Signatec’s complimentary product portfolio will round out their product offering and help to ensure continued innovation. We are looking forward to a very productive future as members of DynamicSignals,” Hunt added.

About DynamicSignals

DynamicSignals LLC (DynamicSignals.com) provides high-performance, accurate, and reliable data acquisition and control solutions.

GaGe, KineticSystems, Signatec, Preston Scientific and Cyber Systems, all brands of the DynamicSignals growing family, serve a wide-range of industries by providing instruments and modules for PC-based test and measurement systems and synthetic instrumentation built on the PCIe/PCI, USB, ExpressCard, cPCI/PXI, VXI and proprietary platforms.

DynamicSignals’ products are used across diverse industries such as Communications, Computers, Military/Aerospace, Fundamental Research, and Education. Applications served are Manufacturing Test, Radar (SIGINT), Ultrasonics, Lasers/LIDAR, Spectroscopy, Automated Test Equipment, etc.

For more information on DynamicSignals or any of its products, contact the company at 900 N. State Street, Lockport, IL 60441.
